Toxicology 214 (2005) 272–275

TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 214

Acetylcholinesterase; Paraoxon; Diaphragm; Oximes; Neuromuscular junction **214**, 190

Acute exposure; Inhalation; Risk assessment; Sensitive subpopulation; Kinetic model; Dichloromethane **214**, 256

Alipahtic ethers; Oral toxicity; Diesel additives; Testicular toxin; 2-Methoxyace **214**, 99

Aniline; Methemoglobin; Concentration–time-dependence; Inhalation uptake; Dermal uptake; Benchmark analysis **214**, 140

Antioxidant enzymes; Hexachlorocyclohexane; Brain regions; Lipid peroxidation **214**, 123

Apoptosis; Bile acid; Hepatocytes; Ursodeoxycholic acid; Glycochenodeoxycholic acid **214**, 77

Benchmark analysis; Methemoglobin; Aniline; Concentration–time-dependence; Inhalation uptake; Dermal uptake **214**, 140

Bensultap; Rat; Cortex slice; Synaptic strength; LTP; Open-field behavior; Sleep characteristics; Fipronil **214**, 67

Bile acid; Apoptosis; Hepatocytes; Ursodeoxycholic acid; Glycochenodeoxycholic acid **214**, 77

Biological agents; Chemical agents; History **214**, 167

Biological weapon; Clostridial neurotoxin; Botulinum neurotoxin; Tetanus neurotoxin; Ricin; Trichothecene; Treatment **214**, 210

Biomonitoring; Organophosphates; Exposure; Poisoning; Diagnosis **214**, 182

Botulinum neurotoxin; Clostridial neurotoxin; Tetanus neurotoxin; Ricin; Trichothecene; Biological weapon; Treatment **214**, 210

Brain regions; Hexachlorocyclohexane; Antioxidant enzymes; Lipid peroxidation **214**, 123

CAR; Depleted uranium; CYP3A; PXR **214**, 113

Cell death; Organochalcogens; Methylmercury; Glutamate; Ebselen **214**, 57

Chelation therapy; Lead poisoning; Oxidative stress; *meso*-2,3-Dimercaptosuccinic acid; Monoesters **214**, 39

Chemical agents; Biological agents; History **214**, 167

Chemical warfare agent; Poisoning; Diagnosis; Treatment; Clinical toxicologist **214**, 221

Chemical warfare agents; Sulphur mustard; Toxicology; Human; Treatment; Vesicants **214**, 198

Chemical warfare; Emergency planning; Preparedness; Stockpiling; Toxic agent **214**, 232

Chemical weapons; Geneva Protocol; International law; OPCW; WHO **214**, 249

Clinical toxicologist; Chemical warfare agent; Poisoning; Diagnosis; Treatment **214**, 221

Clostridial neurotoxin; Botulinum neurotoxin; Tetanus neurotoxin; Ricin; Trichothecene; Biological weapon; Treatment **214**, 210

doi:10.1016/S0300-483X(05)00448-8

Concentration–time-dependence; Methemoglobin; Aniline; Inhalation uptake; Dermal uptake; Benchmark analysis **214**, 140

Cortex slice; Rat; Synaptic strength; LTP; Open-field behavior; Sleep characteristics; Bensultap; Fipronil **214**, 67

Cosmetics; Polyethylene glycol; PEG; Safety assessment; Toxicology **214**, 1

CYP3A; Depleted uranium; PXR; CAR **214**, 113

Depleted uranium; CYP3A; PXR; CAR **214**, 113

Dermal uptake; Methemoglobin; Aniline; Concentration–time-dependence; Inhalation uptake; Benchmark analysis **214**, 140

Diagnosis; Chemical warfare agent; Poisoning; Treatment; Clinical toxicologist **214**, 221

Diagnosis; Organophosphates; Exposure; Poisoning; Biomonitoring **214**, 182

Diaphragm; Paraoxon; Acetylcholinesterase; Oximes; Neuromuscular junction **214**, 190

Dichloromethane; Acute exposure; Inhalation; Risk assessment; Sensitive subpopulation; Kinetic model **214**, 256

Diesel additives; Oral toxicity; Alipahtic ethers; Testicular toxin; 2-Methoxyace **214**, 99

Ebselen; Organochalcogens; Methylmercury; Glutamate; Cell death **214**, 57

Efflux; P-glycoprotein; Xenobiotic transport; Rhodamine 123; Rainbow trout; Energetic costs **214**, 87

Emergency planning; Chemical warfare; Preparedness; Stockpiling; Toxic agent **214**, 232

Energetic costs; P-glycoprotein; Efflux; Xenobiotic transport; Rhodamine 123; Rainbow trout **214**, 87

Exposure; Organophosphates; Poisoning; Diagnosis; Biomonitoring **214**, 182

Fipronil; Rat; Cortex slice; Synaptic strength; LTP; Open-field behavior; Sleep characteristics; Bensultap **214**, 67

Geneva Protocol; Chemical weapons; International law; OPCW; WHO **214**, 249

Glutamate; Organochalcogens; Methylmercury; Ebselen; Cell death **214**, 57

Glycochenodeoxycholic acid; Apoptosis; Bile acid; Hepatocytes; Ursodeoxycholic acid **214**, 77

Hepatocytes; Apoptosis; Bile acid; Ursodeoxycholic acid; Glycochenodeoxycholic acid **214**, 77

Hexachlorocyclohexane; Brain regions; Antioxidant enzymes; Lipid peroxidation **214**, 123

History; Chemical agents; Biological agents **214**, 167

Human; Chemical warfare agents; Sulphur mustard; Toxicology; Treatment; Vesicants **214**, 198

Inhalation uptake; Methemoglobin; Aniline; Concentration–time-dependence; Dermal uptake; Benchmark analysis **214**, 140

Inhalation; Acute exposure; Risk assessment; Sensitive subpopulation; Kinetic model; Dichloromethane **214**, 256

International law; Chemical weapons; Geneva Protocol; OPCW; WHO **214**, 249

Ischemic stroke; PARP inhibitor; MMP-9; NF-κB **214**, 131

Kinetic model; Acute exposure; Inhalation; Risk assessment; Sensitive subpopulation; Dichloromethane **214**, 256

Lead poisoning; Oxidative stress; Chelation therapy; *meso*-2,3-Dimercaptosuccinic acid; Monoesters **214**, 39

Lipid peroxidation; Hexachlorocyclohexane; Brain regions; Antioxidant enzymes **214**, 123

LTP; Rat; Cortex slice; Synaptic strength; Open-field behavior; Sleep characteristics; Bensultap; Fipronil **214**, 67

***meso*-2,3-Dimercaptosuccinic acid**; Lead poisoning; Oxidative stress; Chelation therapy; Monoesters **214**, 39

Methemoglobin; Aniline; Concentration–time-dependence; Inhalation uptake; Dermal uptake; Benchmark analysis **214**, 140

2-Methoxyace; Oral toxicity; Alipahtic ethers; Diesel additives; Testicular toxin **214**, 99

Methylmercury; Organochalcogens; Glutamate; Ebselen; Cell death **214**, 57

MMP-9; Ischemic stroke; PARP inhibitor; NF-κB **214**, 131

Monoesters; Lead poisoning; Oxidative stress; Chelation therapy; *meso*-2,3-Dimercaptosuccinic acid **214**, 39

Neuromuscular junction; Paraoxon; Acetylcholinesterase; Diaphragm; Oximes **214**, 190

NF-κB; Ischemic stroke; PARP inhibitor; MMP-9 **214**, 131

OPCW; Chemical weapons; Geneva Protocol; International law; WHO **214**, 249

Open-field behavior; Rat; Cortex slice; Synaptic strength; LTP; Sleep characteristics; Bensultap; Fipronil **214**, 67

Oral toxicity; Alipahtic ethers; Diesel additives; Testicular toxin; 2-Methoxyace **214**, 99

Organochalcogens; Methylmercury; Glutamate; Ebselen; Cell death **214**, 57

Organophosphates; Exposure; Poisoning; Diagnosis; Biomonitoring **214**, 182

Oxidative stress; Lead poisoning; Chelation therapy; *meso*-2,3-Dimercaptosuccinic acid; Monoesters **214**, 39

Oximes; Paraoxon; Acetylcholinesterase; Diaphragm; Neuromuscular junction **214**, 190

Paraoxon; Acetylcholinesterase; Diaphragm; Oximes; Neuromuscular junction **214**, 190

PARP inhibitor; Ischemic stroke; MMP-9; NF-κB **214**, 131

PEG; Polyethylene glycol; Cosmetics; Safety assessment; Toxicology **214**, 1

P-glycoprotein; Efflux; Xenobiotic transport; Rhodamine 123; Rainbow trout; Energetic costs **214**, 87

Poisoning; Chemical warfare agent; Diagnosis; Treatment; Clinical toxicologist **214**, 221

Poisoning; Organophosphates; Exposure; Diagnosis; Biomonitoring **214**, 182

Polyethylene glycol; PEG; Cosmetics; Safety assessment; Toxicology **214**, 1

Preparedness; Chemical warfare; Emergency planning; Stockpiling; Toxic agent **214**, 232

PXR; Depleted uranium; CYP3A; CAR **214**, 113

Rainbow trout; P-glycoprotein; Efflux; Xenobiotic transport; Rhodamine 123; Energetic costs **214**, 87

Rat; Cortex slice; Synaptic strength; LTP; Open-field behavior; Sleep characteristics; Bensultap; Fipronil **214**, 67

Rhodamine 123; P-glycoprotein; Efflux; Xenobiotic transport; Rainbow trout; Energetic costs **214**, 87

Ricin; Clostridial neurotoxin; Botulinum neurotoxin; Tetanus neurotoxin; Trichothecene; Biological weapon; Treatment **214**, 210

Risk assessment; Acute exposure; Inhalation; Sensitive subpopulation; Kinetic model; Dichloromethane **214**, 256

Safety assessment; Polyethylene glycol; PEG; Cosmetics; Toxicology **214**, 1

Sensitive subpopulation; Acute exposure; Inhalation; Risk assessment; Kinetic model; Dichloromethane **214**, 256

Sleep characteristics; Rat; Cortex slice; Synaptic strength; LTP; Open-field behavior; Bensultap; Fipronil **214**, 67

Stockpiling; Chemical warfare; Emergency planning; Preparedness; Toxic agent **214**, 232

Sulphur mustard; Chemical warfare agents; Toxicology; Human; Treatment; Vesicants **214**, 198

Synaptic strength; Rat; Cortex slice; LTP; Open-field behavior; Sleep characteristics; Bensultap; Fipronil **214**, 67

Testicular toxin; Oral toxicity; Alipahtic ethers; Diesel additives; 2-Methoxyace **214**, 99

Tetanus neurotoxin; Clostridial neurotoxin; Botulinum neurotoxin; Ricin; Trichothecene; Biological weapon; Treatment **214**, 210

Toxic agent; Chemical warfare; Emergency planning; Preparedness; Stockpiling **214**, 232

Toxicology; Chemical warfare agents; Sulphur mustard; Human; Treatment; Vesicants **214**, 198

Toxicology; Polyethylene glycol; PEG; Cosmetics; Safety assessment **214**, 1

Treatment; Chemical warfare agent; Poisoning; Diagnosis; Clinical toxicologist **214**, 221

Treatment; Chemical warfare agents; Sulphur mustard; Toxicology; Human; Vesicants **214**, 198

Treatment; Clostridial neurotoxin; Botulinum neurotoxin; Tetanus neurotoxin; Ricin; Trichothecene; Biological weapon **214**, 210

Trichothecene; Clostridial neurotoxin; Botulinum neurotoxin; Tetanus neurotoxin; Ricin; Biological weapon; Treatment **214**, 210

Ursodeoxycholic acid; Apoptosis; Bile acid; Hepatocytes; Glycochenodeoxycholic acid **214**, 77

Vesicants; Chemical warfare agents; Sulphur mustard; Toxicology; Human; Treatment **214**, 198

WHO; Chemical weapons; Geneva Protocol; International law; OPCW **214**, 249

Xenobiotic transport; P-glycoprotein; Efflux; Rhodamine 123; Rainbow trout; Energetic costs **214**, 87
